Rohan Singh Rajput

+91-7665505428 | rsr86854@gmail.com | linkedin.com/in/rohansinghrajput06

Technical Skills

Languages: **Go** (**Golang**), **Python**
Go Ecosystem: Microservices Architecture, Clean Architecture, Goroutines, errgroup, context
Architecture & System Design: Distributed Systems, RESTful APIs, gRPC, CAP Theorem, Caching Strategies
Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD Pipelines, Jenkins, Bitbucket, Git
Databases & Streaming: PostgreSQL, MongoDB, MS SQL Server, DynamoDB, MySQL, Redis, Apache Kafka, SQL
Observability & Quality: OpenTelemetry, Dynatrace, Automated Testing
AI & Productivity: Gemini-cli, Opencode, Claude, ChatGPT

Experience

Senior Backend Engineer - Golang March 2025 – Present
Axis Direct *Title: Manager M3*

- Overhauled the Security Master platform architecture, slashing API latency by **60%**, by engineering cron-driven **DynamoDB** caching and rewriting **25+ Golang** microservices.
- Optimized the options chain data retrieval logic, reducing peak response times from **5s** to under **100ms**, by introducing a dynamic, highly available **Redis** caching layer.
- Delivered a scalable multi-portfolio management system, enabling seamless user toggling with drastically reduced system latency, by optimizing **SQL Stored Procedures** and building robust cache mechanics.
- Launched a new backend Watchlists feature, reducing average market instrument search time by **70%** and boosting platform retention, by taking end-to-end **Go** development ownership.
- Elevated overall system reliability to **99.99%** uptime, significantly expediting QA cycles, by mentoring **4** engineers and implementing **Docker**-based containerized testing setups.
- Lowered server infrastructure costs and minimized technical debt, successfully decommissioning redundant processes, by refactoring core interfaces into reusable **Golang** libraries.

Software Development Engineer 1 June 2022 – Feb 2025
Wiz Freight *Chennai*

- Optimized an **AWS**-deployed task management system, reducing manual intervention by **30%**, by developing robust **RESTful** and **gRPC** APIs in **Golang** utilizing a bounded worker pool pattern.
- Enhanced logistics algorithms and ERD workflows, reducing system navigation time by **40%** and transportation costs by **25%**, by building real-time **WebSocket** integrations using **Go**.

Software Developer Intern Jan 2022 – Apr 2022
NGP Websmart Pvt. Ltd

- Streamlined routine operational workflows, driving a **15%** improvement in team productivity, by engineering custom automation scripts in **Python**.

Leadership & Awards

Best Debutant Award | *Axcellence 2026, Axis Direct* July 2026

- Awarded for outstanding platform impact as a recently onboarded Senior Engineer, driving rapid architectural improvements and stability through high-quality **Golang** backend delivery.

Founding Member & Lead | *CodeChef SRM Students' Chapter*

- Spearheaded the establishment of the university's competitive programming chapter, fostering a technical community of developers through algorithmic coding contests and workshops.

Open Source Contributions

JFrog CLI | *github.com/goyalayush0610/jfrog-cli/pull/2*

- Engineered automated **Bitbucket** tag creation triggered by new **JFrog/Artifactory** releases, contributing **Go** code to streamline **CI/CD** pipelines and eliminate manual tagging errors.

Education

SRM Institute of Science and Technology KTR
*B.Tech in Computer Science Engineering; GPA: **8.96** | SRMJEEE 2018 Rank: **1001*** *June 2018 – May 2022*

Raath International School Behror, Rajasthan
*Class 12th, CBSE; Percentage: **94.2%*** *2017*
